

# Brainomics Localizer Data Dictionary

**Dataset:** Brainomics Localizer

**Version:** 1.0

**Created:** 2025-12-14T17:49:34.199687

## **subject\_id**

**Description:** Unique subject identifier

**Type:** string

## **age**

**Description:** Age of participant at time of scan

**Type:** integer

**Unit:** years

**Range:** [18, 65]

## **sex**

**Description:** Biological sex of participant

**Type:** categorical

**Valid values:** M, F

## **handedness**

**Description:** Dominant hand of participant

**Type:** categorical

**Valid values:** R, L, A

## **contrast\_type**

**Description:** Type of fMRI contrast

**Type:** categorical

**Valid values:** checkerboard, sentence, calculation, motor

## **scan\_date**

**Description:** Date of MRI acquisition

**Type:** date

## **TR**

**Description:** Repetition time

**Type:** float

**Unit:** seconds

## **n\_volumes**

**Description:** Number of fMRI volumes acquired

**Type:** integer
